

We are currently recruiting for a **Mid-level UI Developer (Hybrid)** to join our expanding FarmOps team in Mallow, Co. Cork.

FarmOps is an App which offers farmers trusted recommendations to allow the best possible decisions ensuring farm sustainability. If you are looking for a challenge and would like the opportunity to work in a vibrant growing company, Munster Bovine would like to hear from you.

This will be a hands-on software delivery role working within a small agile team working in a highly collaborative manner. The role is primarily focused on using the latest UI technologies for both Web and Mobile with the opportunity to extend skillset to become a Full Stack Software Developer by gaining commercial experience working with the DotNet Framework, Azure and Microsoft DevOps.

As a software developer, you will primarily be responsible for converting project requirements into high-quality code. As this will involve close, daily interaction within the context of an agile team, your communication and people skills will need to be superb.

Only candidates with web and / or mobile app development experience using Angular or React need apply.

What are the responsibilities of the role?

- Actively contribute to an agile mind set and a positive working environment within the team.
- Actively participate in the creation of high-quality software within agreed project deadlines.
- Actively contribute to high standards of code quality personally and within the team by utilising and contributing to best-in-class development practices and habits.
- Ability to have a positive impact on others and communicate openly and directly to individuals or groups at all levels.
- Actively participate in and contribute to your team's continuous improvement practices.
- Demonstrate a proactive approach to "getting things done", accountability & ownership and the ability to prioritise your own workload.
- Collaborate effectively with our team to assist in the planning, designing, development, testing, and maintenance of our applications.
- Development of application features with minimal supervision or guidance.
- Providing realistic estimates of development effort to assist in team planning.

- Assisting with the production of solution design documentation in line with company standards.
- Participate actively and contribute to peer-to-peer code reviews.
- Adopt our code quality processes and ensure they are used when producing code.
- Perform 3rd line support diagnosing and resolving technical engineering issues, as required.
- Provide assistance to QA and support personnel as needed to troubleshoot production issues.

Experience, education, skills required:

- Demonstrable experience using modern front-end technologies (JavaScript / Typescript, AJAX, Angular, Bootstrap, CSS / SCSS, SQLite etc.).
- Experience in mobile app development and deployment using one or more of the following mobile app development technologies an advantage: NativeScript / Xamarin / Ionic / PhoneGap.
- Experience with object-oriented design and implementation techniques such as Test Driven development, Enterprise implementation patterns and SOLID principles.
- Good understanding of object-oriented and service-oriented application development techniques and theories
- Experience with debugging, performance profiling and application optimization.
- Exposure to building and managing distributed web systems.
- Experience with source control management systems and continuous integration/delivery environments.
- Experience with agile development methodologies (Scrum, Kanban) and automated testing.
- Database design and implementation on both relational and non-relational platforms.
- Excellent written and verbal communication skills.
- Self-motivated and enthusiastic.

Interested candidates should forward a copy of their cover letter and up-to-date CV in strictest confidence by Friday 24th June 2022 to Denise Murphy, HR Manager, Ballyvorisheen, Mallow, Co. Cork to careers@munsterbovine.ie
